

File Attachment Multifile

Upload one or more files to Quick Base at the same time

Highlights of File Attachment Multifile

- ✓ Select multiple files to be uploaded into Quick Base
- ✓ Uploaded files are stored in a "child" or "details" table and related back to the "parent" record from where the upload was initiated
- ✓ Maintain a document library table, storing all files in a single table, related to multiple "parent" tables
- ✓ Add as much metadata to the document library table as you need, it's a standard Quick Base table that you have full control over
- ✓ Meta data can be viewed/edited right from the upload file window
- ✓ Choose to allow duplicate files to be uploaded or not
- ✓ Each file selected must not exceed 20MB in size. The total of all files selected can exceed 20MB but each file must be less than 20MB
