

Document Parser

Automatically save data from your PDFs into Quick Base with ease

Document Parser enables you to import data from a PDF email attachment into Quick Base. Simply provide us with a sample PDF document that you would like to parse and identify the keywords from which you would like to extract the information from. Map “keywords” from your PDF document to fields from your Quick Base table. Once the mapping is in place, sending an email with one or more PDF documents attached will start the import. Process can also insert the PDF documents as file attachments to the same table.

Highlights of the Document Parser

- ✓ Get Invoice/PO Numbers, Dates and Amounts
- ✓ Get up to **10 fields of data** from the PDF document
- ✓ **Save** the PDF document in Quick Base
- ✓ **Send multiple** PDF's in a single email
- ✓ **Save line item** details in a Subtable and relate them to the master
- ✓ As easy as sending PDF attachments via email

Purchase Order PDF

JUICED TECHNOLOGIES Purchase Order

PO #: QBJ19
