

Text My Quick Base

With our **Text My Quick Base** add-on you can send and receive text messages within your Quick Base application. **Text My Quick Base** can also send bulk messages to multiple recipients at once. Messages sent are logged in a “Messages” table within your application where you can build out complex workflows with “Actions”, “Webhooks”, “Automations”, etc. One simple text can automate various work flows to support your business processes...

Some typical use-cases for Text My Quick Base:

- ✓ Send out **reminder** “texts” to one or many customers/business partners
- ✓ Allow users to Query data from your Quick Base applications
- ✓ Provide info to users with “keywords” without having them to sign into Quick Base
- ✓ Deliver **one or many** messages in seconds
- ✓ Allow recipients to **reply back** with two-way communication.
- ✓ Trigger workflows using various automation techniques
