

Built specifically for Quickbase, JuicedSign lets you securely send, electronically sign, and track signatures directly from within your application. Whether you need to send invoices, contracts, or approval forms, JuicedSign streamlines your workflow and reduces turnaround times and provides real-time updates and seamless integration with Quickbase.

Key Benefits:

Designed with Quickbase in Mind

JuicedSign is easy to use and flows seamlessly inside of your Quickbase application.

Track and Manage the Approval Process

See the status of your pending/completed agreements without ever having to leave your Quickbase application.

Legally Binding Signatures

All signatures that are executed using JuicedSign will be legally binding.

Product Features:

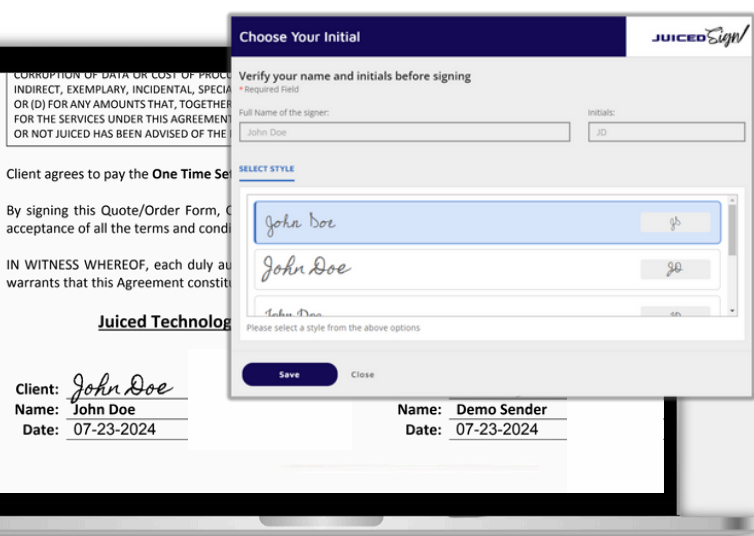

- Provides audit trails, including timestamps, IP addresses, and user information, in Quickbase.
- Ensures secure communication with 256-bit encryption for all data sent to and from JuicedSign.
- Verify document authenticity with tamper-evident checksums to protect integrity.
- Automatically collect and save signer data directly in Quickbase for easy access and organization.
- Simplify your signing process with an intuitive and user-friendly interface.

Commonly Paired Add-Ons:

- **Exact Forms Plus:** Generate agreements to be signed.
- **Package Builder:** Create a set of documents to be routed for signature.

Common Use Cases:

- ✓ Non-Disclosure Agreement (NDA)
- ✓ Workforce and Supplier Onboarding
- ✓ Contract Lifecycle Management (CLM)
- ✓ Configure, Price, Quote (CPQ) Processes
- ✓ Permits and Licensing
