

# Text My Quickbase

Simple & fast text messaging for your Quickbase app

Text My Quickbase offers a seamless way to stay updated by automatically sending messages with a button click or whenever records are created or modified. This can also facilitate two-way real-time communication and deliver instant messaging within Quickbase, ensuring smooth operations and keeping your team effortlessly connected.

## Key Benefits:

### Inbound and Outbound Texting

Receive and send text messages to your clients and team members directly from your Quickbase.

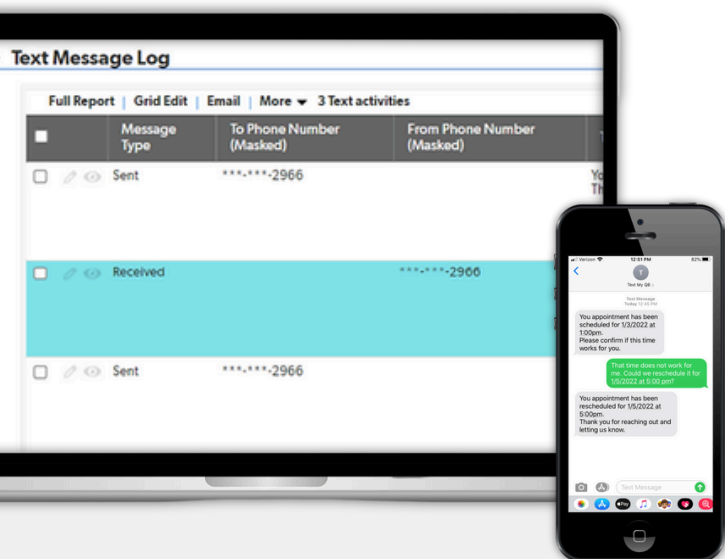

### Reminders, Notifications and Updates

Have your service reps send a text when the shipment has been delivered or when an appointment is coming due.

### Track Conversations Within Your App

Log texts in messages table within Quickbase to streamline complex workflows using actions, webhooks, pipelines, and more.

Scan to schedule a free consultation with our Customer Success Team and see how Text My Quickbase fits your needs.

## Product Features:

- Send messages to one or more recipients at once.
- Send texts on a scheduled basis.
- Automatic message response using key-words.
- Send documents or images via SMS directly from within Quickbase.

## Commonly Paired Add-Ons:

- **Courier:** Send corresponding notifications, reminders, and updates via emails, in addition to SMS.
- **Exact Forms Plus:** Easily create customized Word and/or PDF files and receive SMS notifications when documents are ready. Send files via SMS (HTML, PDF, or image formats, up to 2MB)

## Commonly Generated Documents:

- ✓ Alerts & Notifications
- ✓ Field Operations
- ✓ Survey & Feedback
- ✓ Reminder Texts
- ✓ Schedule Appointments
- ✓ Query data from QB Applications
- ✓ Status Updates (Project Status, Inventory Levels, Sales Figures)
